International and European Studies Application and Research Center Activities

Partnerships

- **Sustainable Development Goals Stakeholder Platform (2017- continuing)**

This platform was established with the collaboration of CIES and Corporate Social Responsibility Association of Turkey. The platform emphasizes the collaboration between the stakeholders representing the private sector, civil society, public and academic environment with the aim to increase the impact and contribute to the agenda of the Sustainable Development Goals. Developmental Talks organized within the scope of this platform: Seminars titled Global Approach, Global Goals and Local Solutions are organized.

- **Achieving the Favorable Governance: Civil Society and Empowerment of the Youth December 2017-June 2019**

Supported under the Matra Program of the Dutch Consulate, the aim of the project is to strengthen the youth and civil society in line with the sustainable development goals. Within the scope of the project, non-governmental organizations and youth were provided with trainings in areas such as climate change, gender equality, project management, volunteering, migration and settlement of the conflicts in line with sustainable development goals.

- **A New Initiative: Free Social Consciousness 1 "Role of NGOs during the COVID19 Outbreak" – 18 May 2020**

A new initiative has been launched to examine and discuss the changes that may be encountered in the society after COVID19 outbreak with the collaboration of Center of International and European Studies (CIES), Corporate Social Responsibility Association of Turkey and Sosyal Onay Danışmanlık. Basically, it is aimed to investigate the new social awareness that will enable different social actors (NGOs, business world, academia, local and regional administrations) to work in interaction and collaborate with each other in understanding our new normal that will be redefined with the pandemic. In fact, the actions, goals, and priorities of the existing Sustainable Development Goals offer us perspectives in explaining our post-pandemic situation.

Project

- **BAP Project: Perceptions of the Private Sector and Civil Society Organizations in Turkey regarding Sustainable Development Goals and Analysis of Goal-Directed Activities November 2018-June 2019**

The project covers the first detailed analysis and report examining perceptions and practices of non- governmental organizations and the business world in Turkey towards Sustainable Development Goals. This project analyzes the perceptions of non-governmental organizations and companies towards the Sustainable Development Goals in detail and reveals their level of awareness on the subject. This perception analysis reveals the goals of focus by examining the applications addressing the projected SDGs.

Meetings

- **Free Social Consciousness 2**
"The Role of Politics and Civil Society in the post-COVID 19 Era" - 22 June 2020

The second meeting of the Free Social Consciousness series was held on "The role of politics and civil society in the post-COVID 19 era". In this online seminar, issues such as the economic uncertainty encountered in the light of the current situation combined with pandemic conditions in the United States and Europe and protests in the USA, the global resonance of a new generation of civic engagement and their effects on sustainable development goals were discussed.

- **Free Social Consciousness 3**
"How Can NGOs Respond to Difficulties Experienced Today" - 2 July 2020

Our aim with this online seminar is to focus on the national and international policies and priorities of NGOs in the post-Covid-19 period. The answers to the below mentioned questions are discussed: What should their focus be? What may be their contributions to sustainability?

What are their responsibilities in the management of social consciousness, for example in the expression of anger? What strategies should they pursue?

Directorate of Core Program Activities

The academic vision of the KHAS Core Program basically emphasizes the importance of collaborations and partnerships that can be established in line with the objectives. The pedagogical approach also tries to improve the communication and co-production of the students with each other with the program and different methods developed with this philosophy.

Course

- Course: IR506 Global Approaches to Sustainable Development
Spring 2018-2019

The aim of this course is to enable students to understand and discover sustainable development. The course also focuses on the environmental, social and economic aspects of sustainable development as well as national and global governance aspects. The course is lectured both theoretically and practically. It aims to actively involve students in sustainable

development with the projects they produce. The course covers all sustainable development goals.
